*Long term (stable) housing refers to clients ending support in public or community housing (renter or rent free), private or other housing (renter, rent free or owner), or institutional settings. Definition sourced from the [Australian Institute of Health and Welfare](#)

**Where a housing situation contains selections from both the 'homeless' and 'not homeless' categories, it may be classed as 'contradictory.' Due to the large number of possible combinations, a small number of housing situations may not fit neatly into the categories above.

Definitions for all of the items above can be found in the [AIHW Specialist Homelessness Services Collection Manual](#). If you are still unsure how to record a clients housing situation, and need guidance, please contact HousingH2H@sa.gov.au
